

Grade 4 Academic Standards

Soybean Study

Science

- 4.1.2 Recognize and describe that results of scientific investigations are seldom exactly the same. If differences occur, such as a large variation in the measurement of plant growth, propose reasons for why these differences exist, using recorded information about investigations.
- 4.2.4 Use numerical data to describe and compare objects and events.
- 4.2.5 Write descriptions of investigations, using observations and other evidence as support for explanations.
